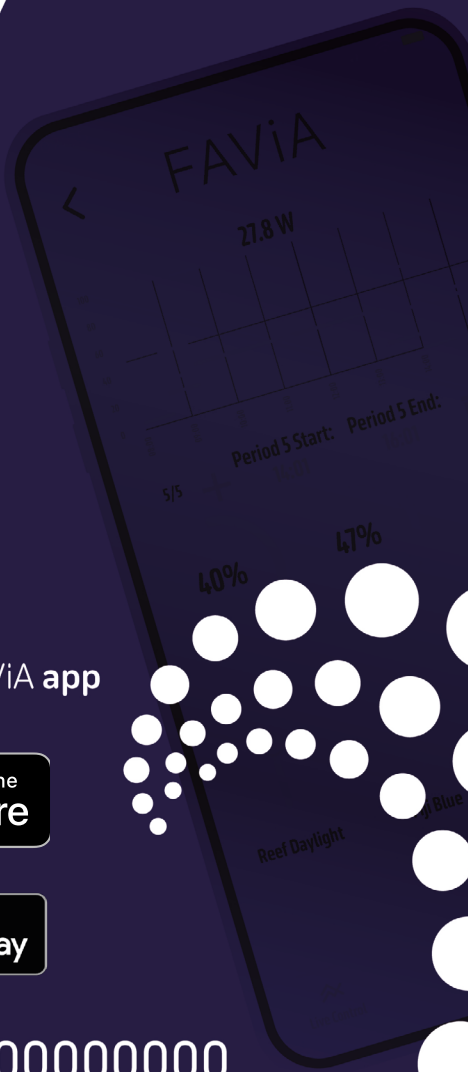
P2, P5 & P9

tmc FAViA

TMC FAViA App Instructions



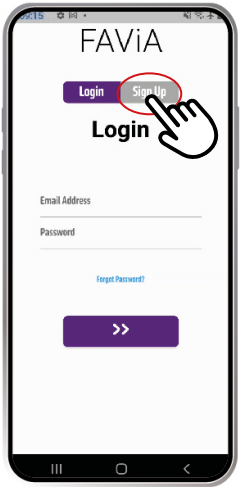
Download the FAViA app

Download on the App Store

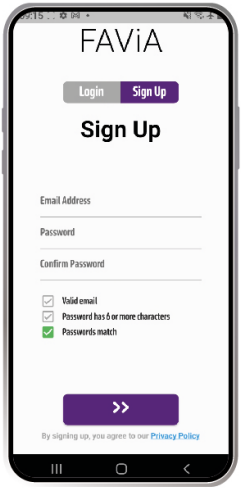
GET IT ON Google Play

Light Network Password: 00000000

CREATE A FAViA ACCOUNT

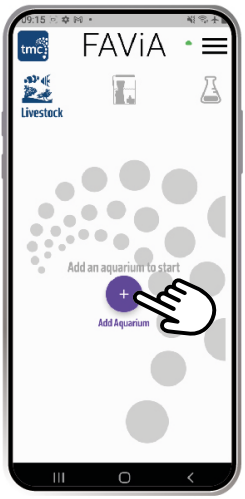


1. Once downloaded, open the app. and click sign up

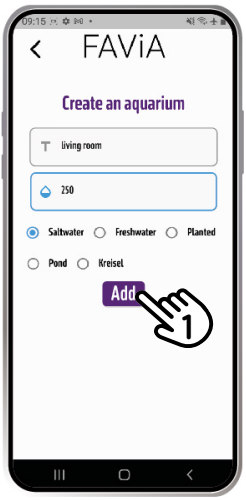


2. **(1)** Enter your email address then **(2)** enter a password that is more than 6 characters long and **(3)** click ">>" button.

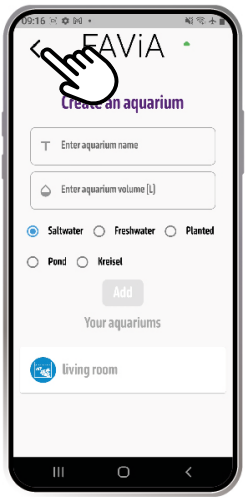
CREATE AN AQUARIUM



3. Click the + icon



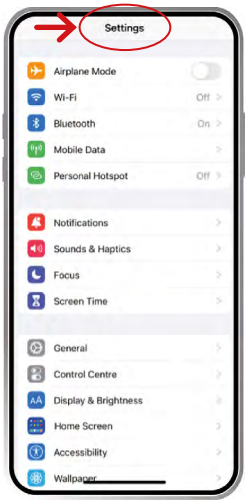
4. Enter your aquarium name, volume and the type of aquarium it is then click "Add"



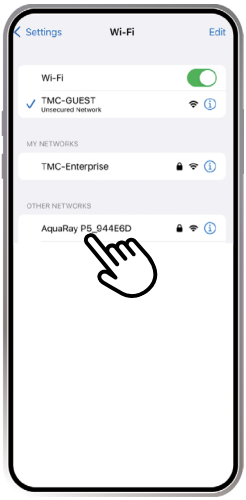
5. Click the back arrow to go back to the main page.

CONNECTING TO FAViA

Light Network Password: 00000000

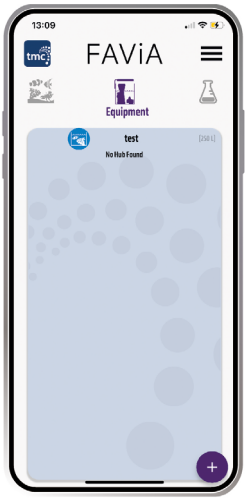


1. Go to your device's **settings**.

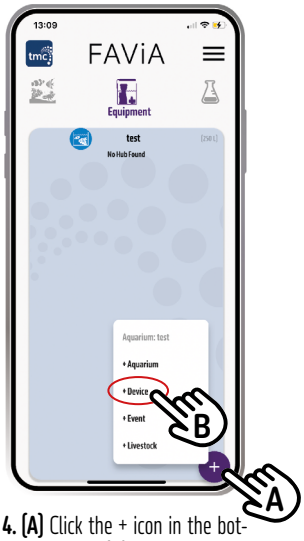


2. Select the network name that begins with: "AquaRay P" and enter the password 00000000 (eight zeros).

IF PROMPTED, PRESS "KEEP TRYING WI-FI".



3. Swipe to the aquarium you wish to add the light to.



4. (A) Click the + icon in the bottom right and **(B)** click + Device.

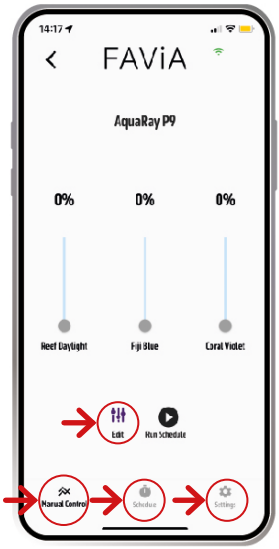
5. The light will then be visible here. NOTE: If not, ensure you are connected to the light's Wi-Fi and you have enabled location permissions for FAViA.

6. (A) Tap the light to highlight it and then **(B)** click connect.

MANUAL CONTROL

1. The light will be visible in the Equipment Tab on the aquarium you added it to.

2. (A) Click the light card to expand and **(B)** click the slider icon to control the light.



EDIT and Manual Control they both give you access to MANUAL CONTROL where you can change the brightness of each channel

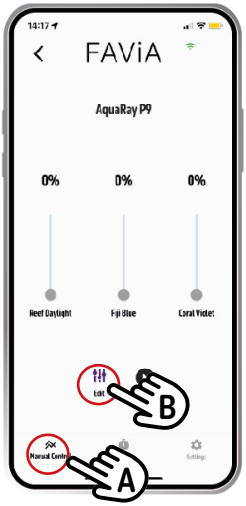
SCHEDULE where you can create a custom schedule or choose from the presets available.

SETTINGS you can choose one of the presets available or import a schedule (for example a schedule from a friend).

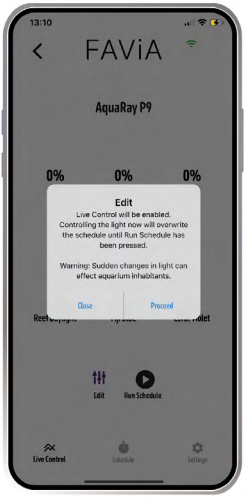
We recommend, once you have a schedule in place, to add effects from within settings.

IMPORTANT: Adding effects will overlay your current settings. If you do this before setting your schedule then uploading it will overwrite any effects you have set previously.

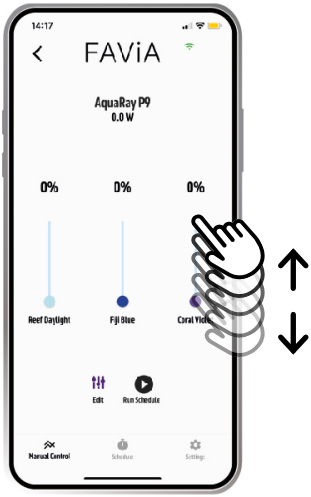
MANUAL CONTROL



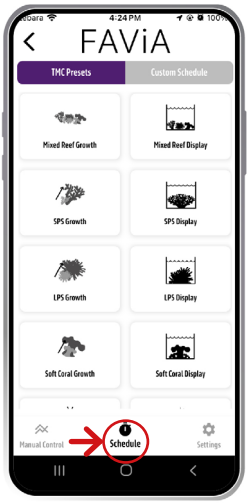
3. (A) Click the bottom left menu option called **"Manual Control"**. Then **(B)** click the **Edit** button to allow manual changes and click proceed.



4. The light will stay at your configuration until you upload a schedule.



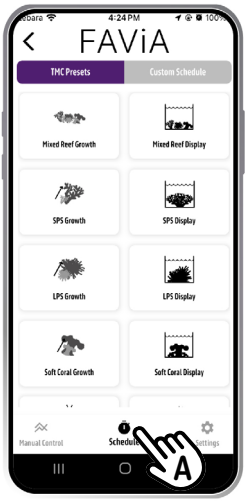
5. Edit mode is enabled you can now change the brightness of each channel on the light using the sliders.



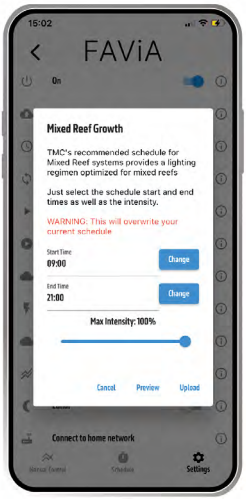
The FAViA app offers the option of a custom schedule or choosing presets.

In the next pages we will explore both.

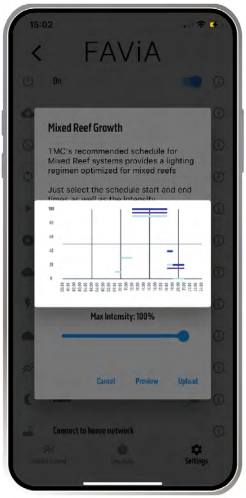
PRESETS



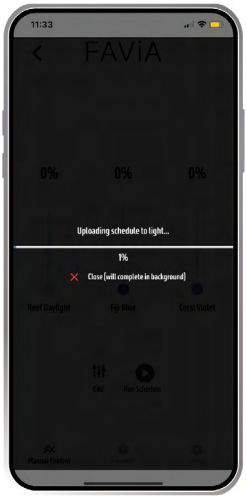
1. (A) Click the bottom middle menu option called **"Schedule".** Select the preset schedule that meets your needs.



2. Once a preset has been selected, you can choose the preset start time, end time and max intensity. The max intensity will scale down the preset to meet the max intensity you set.

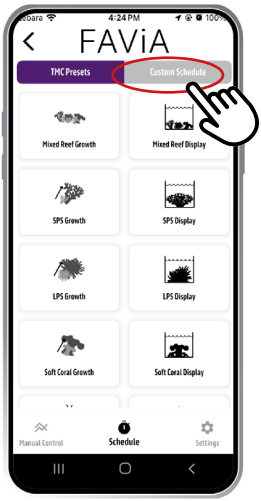


3. 'Preview' shows the original preset (before your modifications).

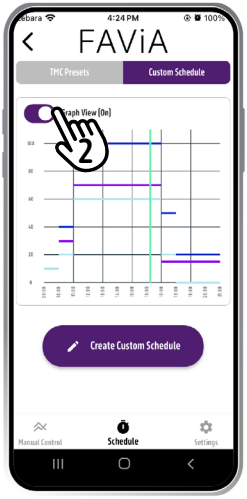


4. 'Upload' the selected preset schedule to the light. **IMPORTANT:** when uploading **any** schedule, make sure you are connected to the correct light.

CUSTOM SCHEDULE



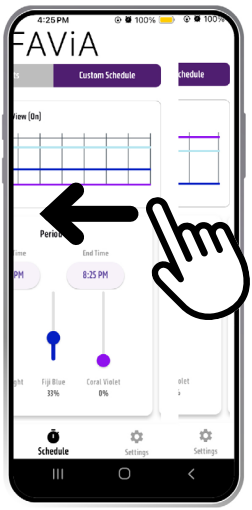
1. Click on 'Custom Schedule' to view your current schedule or/and create a new one



2. There are two options to view current schedule:
- Graph view ON
- Graph view OFF

The choice is yours.

3. Click on 'Create Custom Schedule'.



4. Set a start time, end time and light mix for each of the 5 periods (swipe left to move to the next period).

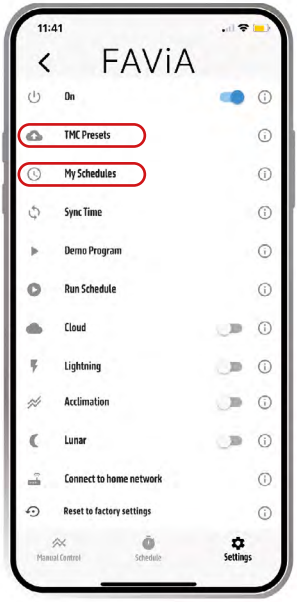
5. Once all 5 periods are set, swipe left again and select the relevant option.

A. Upload to Light,

B. Save the program **To Device** (this will then appear in 'My Schedules' on the Settings page),

C. Play Schedule Demo (will run the schedule where 15 minutes = 4 seconds).

SETTINGS

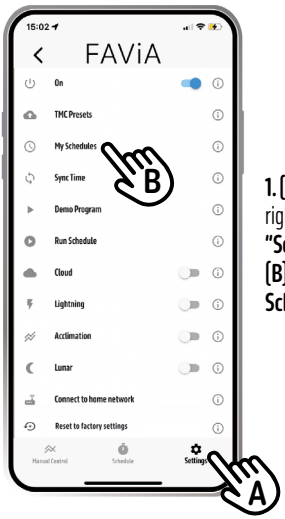


SETTINGS OVERVIEW

- **TMC Presets**
- **My Schedules**
- **Sync Time** will set the lights on-board time to the current time.
- **Demo Program** will run through your schedule. 4 seconds = 15 minutes.
- **Run Schedule** will make the light run the schedule.
- **Cloud** will put the light into a max intensity cloud mode for 3 minutes.
- **Lightning** will put the light into a max intensity lightning mode for 3 minutes.
- **Acclimation** slowly increases lighting over a 10-day period.
- **Lunar** varies intensity of the last schedule period throughout the month.
- By entering your WiFi's SSID and Password, the light can be **connected to the home network** and controlled without first connecting to the light. The light will flash if connection was successful.

MULTIPLE LIGHTS CAN BE JOINED TO THE NETWORK TO ALLOW SYNCED CONTROL

MY SCHEDULES



1. (A) Click the bottom right menu option called **"Settings".**
(B) Then click **My Schedules**.

2. 'My Schedules' tab shows your saved schedules.

Preview schedule

Delete schedule

Upload schedule to light

Save schedule to device

Import schedule allows you to add a schedule saved on your device. You can send schedules to your friends and they can import it here.
